PROJECTS

Resume Analyzer Web Application *Jan 2025 – Mar 2025*

Personal Project | Tech Stack: Python, Flask, NLP, HTML/CSS

- Built a full-stack web application that parses uploaded resumes (PDF/DOCX) and provides AI-driven feedback on content, formatting, and keyword optimization.
- Implemented NLP-based skill extraction using spaCy to match resumes against job descriptions and compute a compatibility score.
- Designed an intuitive dashboard displaying missing keywords, suggested improvements, and an overall resume score out of 100.
- GitHub: github.com/nikita-cs/resume-analyzer

Student Result Management System *Aug 2024 – Nov 2024*

Academic Project | Tech Stack: Java, MySQL, JDBC, Swing

- Developed a desktop application for managing student academic records with role-based access for admin and students.
- Implemented CRUD operations using JDBC with a normalized MySQL database handling 500+ student records efficiently.
- Features include grade calculation, report generation, and export to PDF using iText library.

Personal Portfolio Website *May 2024 – Jun 2024*

Personal Project | Tech Stack: HTML, CSS, JavaScript

- Designed and deployed a responsive personal portfolio showcasing projects, skills, and contact information.
- Incorporated smooth scroll animations, dark/light mode toggle, and mobile-first responsive design principles.
- Hosted on GitHub Pages with a custom domain configuration.
